

INSTRUCTIONS FOR INTERVENTION FEEDBACK FORM (IFF)

I. General Instructions

The Intervention Feedback Form is to be completed during Visit 6 (6 months) and Visit 11 (36 months). This form collects participant feedback on different aspects of the ACHIEVE study.

II. Detailed instructions for each item

0a. Enter the date the form was completed.

0b. Enter staff ID of the person who administered the form

1. Read the introduction sentence to participant.

Questions 1a – 1e all share the same response options. Show and read the response options to the participant before asking 1a – 1e (see response option aid sheet on the following page).

Q1a – 1e: Read each question to the participant. If the participant is uncertain of their answer, keep clarifying their response to reach an agreed answer.

2. This question asks the participant to provide a TOTAL dollar value to the intervention they are receiving based on the degree of benefit they've received and how much they would *theoretically* be willing to pay. If the participant is nervous about answering the question, please reassure them that the intervention they are receiving is completely free, and this is only a theoretical question that is being used for research purposes.

For participants in the Successful Aging education intervention, the participants should consider all the education sessions provided by the health educator and any related handouts that were provided.

For the participants in the Hearing intervention, the participants should consider the hearing aids and any other assistive devices they have received as well as the time and expertise of the audiologist who has been working with them
