

Section 1: Cohort Follow Up

Annual & Semi Annual Follow Up Forms: FORM CODE=AFU-SAF-DEC VERSION=A-M, V1, V2, V3

Instructions: This Follow Up data book describes the composite AFU (annual follow-up) & SAF (semi-annual follow-up) data set, which provides data from AFU form versions A-M, and Version 1, 2, 3 & 4; SAF form version 1, 2, 3 & 4; and DEC (death information) form version 1. Question numbers vary between forms and versions, so we have created common names across all versions. The item number after `_AFUcomp_` indicates the question item number that is used when the question is asked the first time and the letter at the end of the variable name indicates the version of the form that starts asking about that question. The composite data book does not reference skip patterns in the data. Please refer to the pertinent form version to identify the presence of skip patterns. We have also provided the follow up mapping table, which has each question and the corresponding question number by form version. Where AFU version L and M medications in questions 48a-48t did not have an automatically coded Medi-Span code, the medication names were reviewed and manually given a 6 digit code where possible. Note about dates: Dates kept as full date format are AFUcomp1_A & AFUcomp4_A (mm/dd/yyyy - text length 10). The rest of the dates are approximate dates, and have been changed to text format of mm/yyyy (text length 7). All partial date information from source data was included in text dates with `_==_` inserted for any missing month, day, and `_====_` for any missing year.
